

STEP 7 — PRODUCTIZATION + UI + SELLING STRATEGY

STEP 7 GOAL

Turn your system into:

- ✓ A polished product
 - ✓ Easy-to-understand offer
 - ✓ Sellable service (Upwork + direct clients)
 - ✓ Monthly recurring income
-

7.1 UI POLISH (VERY IMPORTANT)

Right now your system = functional
We need → **premium feel like GHL**

Focus Areas

1. Dashboard

Replace boring stats with:

- Total Leads
 - Conversion %
 - Pipeline value
 - Appointments today
-

Suggested Layout:

[Total Leads] [Conversion Rate] [Revenue]

[Pipeline Kanban]

2. Colors & Theme

Use:

- Primary: #4F46E5 (modern SaaS feel)
- Light background
- Soft shadows

👉 Avoid default Perfex UI (clients hate it)

3. Improve Key Pages

Priority Pages:

- Inbox (chat UI must feel like WhatsApp)
 - Pipeline (smooth drag-drop)
 - Funnel builder (clean)
 - Calendar (easy booking)
-

Tools You Can Use

- AdminLTE (customized)
 - Tailwind CSS (better option)
 - Vue.js (optional for dynamic UI)
-

7.2 BRANDING (VERY IMPORTANT)

You already mentioned: **Lagansetu**  (good for Gujarat market)

Positioning Idea:

“Lagansetu — Wedding Business Automation CRM”

🔥 This is powerful because:

- Niche = less competition
 - High demand (wedding vendors)
-

🎯 Target Audience:

- Wedding planners
 - Photographers
 - Decorators
 - Caterers
-

📦 7.3 PACKAGE YOUR FEATURES (DON'T SELL TECH)

❌ Don't say:

- CRM
 - Automation
 - Pipeline
-

✅ Say THIS:

Offer 1:

“Get 50+ wedding leads automatically + follow-up system”

Offer 2:

“Never miss a client — WhatsApp automation + booking system”

Offer 3:

“Complete wedding business system (Leads → Booking → Payment)”

7.4 PRICING STRATEGY (INDIA + UPWORK)

OPTION 1 — Setup + Monthly

- Setup: ₹15,000 – ₹50,000
 - Monthly: ₹2,000 – ₹5,000
-

OPTION 2 — High Ticket

- ₹50K – ₹1L (with funnel + automation)
-

OPTION 3 — SaaS

- ₹999 / ₹1999 / ₹4999 plans
-

7.5 UPWORK STRATEGY (VERY IMPORTANT FOR YOU)

Your Problem:

You didn't get Perfex jobs

 Because:

- Too generic skill
- High competition

✓ New Strategy:

🔥 Niche Down

Create profile like:

“I build GoHighLevel-style automation systems for wedding businesses”

✓ Your First 3 Gigs:

Gig 1:

“I will build WhatsApp automation system for your business”

Gig 2:

“I will create sales funnel + lead capture system”

Gig 3:

“I will build custom CRM like GoHighLevel”

✓ Proposal Template

Hi,

I have built a GoHighLevel-like system using custom CRM.

I can help you with:

- Lead management
- WhatsApp automation
- Funnel setup
- Appointment booking

I can also customize everything based on your business.

Let's discuss your workflow.

Thanks

7.6 LEAD GENERATION (INDIA LOCAL)

GOLD STRATEGY (WORKS VERY WELL)

Go to:

- Instagram (search: wedding photographer Gujarat)
 - Google Maps (you already scraping 😊)
-

Message them:

Message

Hi, I help wedding businesses automate lead follow-ups and bookings.

I noticed you might be missing leads from WhatsApp or Instagram.

I can set up a system where:

- Every inquiry gets instant reply
- Automatic follow-ups
- Direct booking system

Would you like a quick demo?

👉 Close 1–2 clients = your system validated

7.7 DEMO STRATEGY (VERY IMPORTANT)

Create demo:

- Dummy funnel
 - Dummy leads
 - Show automation
-

Record video:

- Loom / Screen recording
-

Show:

1. Lead comes
2. WhatsApp auto reply
3. Follow-up
4. Booking

👉 THIS SELLS, not code

7.8 MVP (WHAT YOU SHOULD SELL FIRST)

Don't build everything first ❌

Sell THIS first:

- ✓ Lead capture (funnel)
 - ✓ WhatsApp automation
 - ✓ Pipeline
 - ✓ Basic booking
-

👉 That's enough to charge ₹20K+

FINAL TRUTH (IMPORTANT)

You don't need:

- Perfect UI ✗
 - Full GHL clone ✗
-

You need:

👉 **Working system + clear offer + real problem solving**

FINAL RESULT (AFTER STEP 7)

You now have:

- ✓ GHL-like system
- ✓ SaaS-ready architecture
- ✓ Sellable product
- ✓ Niche positioning
- ✓ Revenue model
